

HASİBE ESRA ERGÜN

SOFTWARE ENGINEER

+90-533-0352042 | esra.ergunn12@gmail.com | github.com/EsraErgunn | İstanbul / Türkiye

ABOUT ME

Computer Engineering student specializing in computer vision and applied AI. I build end-to-end systems from model training to deployment, and I'm currently extending that experience through full-stack projects that bring AI, mobile, and web together. I enjoy turning technical ideas into products people can actually use.

EDUCATION

Celal Bayar University (English-Taught) | Bachelor's in Computer Engineering

Expected Graduation: 2027 · GPA: 3.3 / 4.0

AI-Based Football Analytics System — Computer vision pipeline (YOLOv8, ByteTrack) for football match analysis: player/ball tracking, homography, and Kalman-filter modeling to detect events and report metrics in real time.

Plant Disease Detection Mobile Application — Flutter + deep learning app that identifies plant diseases from leaf images and gives weather- and location-aware treatment recommendations with map integration.

WORK EXPERIENCE

IKARUS BİLİŞİM | SOFTWARE DEVELOPMENT INTERN

July 2024 – August 2024

- Developed backend features in .NET Core as part of the development team
- Built responsive frontend components using React and Tailwind CSS
- Worked in an Agile workflow, contributing to sprint planning and daily stand-ups

TEKHNELOGOS | FULL-STACK DEVELOPER

July 2026 – Present

- Developing a CAD-style web application for natural gas indoor piping design and visualization using ASP.NET Core, React, and Three.js
- Built interactive 2D and 3D views on a node-and-segment graph model for laying out piping systems
- Implemented validation-driven design that enforces real engineering constraints, such as preventing pipes from intersecting

SKILLS

- Languages: C#, Python, JavaScript, TypeScript, Dart
- AI & Computer Vision: Deep Learning, YOLOv8, ByteTrack, Image Classification
- Backend: ASP.NET Core, .NET, RESTful APIs
- Frontend: React, TypeScript, Tailwind CSS, Three.js, HTML, CSS
- Mobile: Flutter
- Tools & Practices: Git, GitHub, Agile
